# Biotinylated Human Mesothelin / MSLN (296-600) Protein, His,Avitag™ (MALS verified)

Catalog # MSN-H82E7

# **Synonym**

MSLN, Mesothelin, MPF

#### Source

Biotinylated Human Mesothelin (296-600), His,Avitag(MSN-H82E7) is expressed from human 293 cells (HEK293). It contains AA Glu 296 - Thr 600 (Accession # AAH09272.1).

Predicted N-terminus: Glu 296

### **Molecular Characterization**

Mesothelin(Glu 296 - Thr 600)
AAH09272.1

Poly-his Avi

This protein carries a polyhistidine tag at the C-terminus, followed by an Avi tag (Avitag<sup>TM</sup>).

The protein has a calculated MW of 37.8 kDa. The protein migrates as 8 kDa and 42-50 kDa when calibrated against <u>Star Ribbon Pre-stained Protein Marker</u> under reducing (R) condition (SDS-PAGE) due to glycosylation.

#### Labeling

Biotinylation of this product is performed using Avitag<sup>TM</sup> technology. Briefly, the single lysine residue in the Avitag is enzymatically labeled with biotin.

## **Protein Ratio**

Passed as determined by the HABA assay / binding ELISA.

# Endotoxin

Less than 0.1 EU per  $\mu g$  by the LAL method / rFC method.

## **Purity**

>90% as determined by SDS-PAGE.

>90% as determined by SEC-MALS.

# **Formulation**

Lyophilized from  $0.22~\mu m$  filtered solution in PBS, pH7.4 with trehalose as protectant.

Contact us for customized product form or formulation.

#### Reconstitution

Please see Certificate of Analysis for specific instructions.

For best performance, we strongly recommend you to follow the reconstitution protocol provided in the CoA.

#### Storage

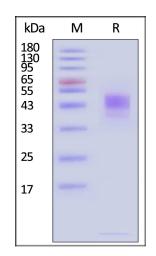

For long term storage, the product should be stored at lyophilized state at -20°C or lower.

Please avoid repeated freeze-thaw cycles.

This product is stable after storage at:

- -20°C to -70°C for 12 months in lyophilized state;
- -70°C for 3 months under sterile conditions after reconstitution.

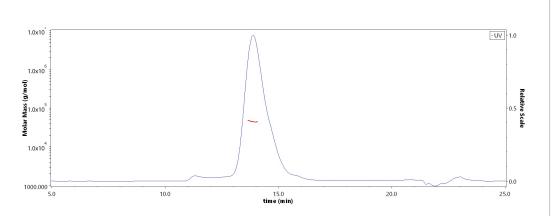

## **SDS-PAGE**

Biotinylated Human Mesothelin (296-600), His, Avitag on SDS-PAGE under reducing (R) condition. The gel was stained with Coomassie Blue. The purity of the protein is greater than 90% (With <u>Star Ribbon Pre-stained Protein Marker</u>).

# **Bioactivity-ELISA**

## **SEC-MALS**

The purity of Biotinylated Human Mesothelin (296-600), His, Avitag (Cat. No. MSN-H82E7) is more than 90% and the molecular weight of this protein is around 35-53 kDa verified by SEC-MALS.

<u>Report</u>

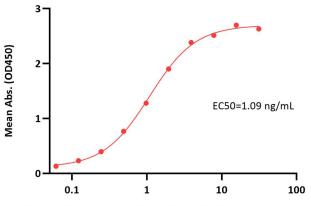

# Biotinylated Human Mesothelin / MSLN (296-600) Protein, His,Avitag™ (MALS verified)

Biotinylated Human Mesothelin (296-600), His,Avitag ELISA 0.1  $\mu$ g of Monoclonal Anti-Human MSLN Antibody, Human IgG1 per well

Biotinylated Human Mesothelin (296-600), His, Avitag Conc. (ng/mL)

Immobilized Monoclonal Anti-Human MSLN Antibody, Human IgG1 at 1  $\mu$ g/mL (100  $\mu$ L/well) can bind Biotinylated Human Mesothelin (296-600), His,Avitag (Cat. No. MSN-H82E7) with a linear range of 0.1-4 ng/mL (QC tested).

# Background

Mesothelin (MSLN) is also known as CAK1 antigen, Pre-pro-megakaryocyte-potentiating factor, which belongs to the mesothelin family. Mesothelin / MSLN can be proteolytically cleaved into the following two chains by a furin-like convertase: Megakaryocyte-potentiating factor (MPF) and the cleaved form of mesothelin. Both MPF and the cleaved form of mesothelin are N-glycosylated. Mesothelin / MSLN can interacts with MUC16. The membrane-anchored forms of MSLN may play a role in cellular adhesion. MPF potentiates megakaryocyte colony formation in vitro.
